

**REMARKS**

This is in response to the Office Action transmitted 10/03/2007.

In response to the species election requirement Applicant elects the (1) localized tissue region species of a breast cancer tumor, and (2) the immune response modifier resiquimod.

Moreover, the claims have been amended (without prejudice to claiming any canceled subject matter in the future) so that claim 1 now includes a Markush group of the localized tissue regions that are the tumors listed in claims 2-14, and limiting to the IRM resiquimod. Support for resiquimod can be found a page 16, line 33, to page 17, line 2.

Examination and reconsideration of the application as amended is requested.

Respectfully submitted,

January 3, 2008
